HEAD AND NECK CANCERS...

- Make up nearly 4% of all cancers in the U.S.
- Are diagnosed in over 65,000 people yearly in U.S.
- Are twice as common in men
- Occur more often in people over age 50
- Patients will most commonly be diagnosed with mouth, throat, or voice box cancer. Paranasal sinus and nasal cavity cancer and salivary gland cancer are much less common

- Tobacco: cigarettes, cigars, pipes, chewing tobacco, snuff
- Alcohol: excessive consumption
- HPV: sexually transmitted infection with human papillomavirus

SIGNS AND SYMPTOMS

- Lump in the mouth, throat, or neck
- A sore in the mouth or throat
- Hoarseness or change in voice
- Swallowing problems or pain
- Difficulty moving the tongue
- Bleeding in the nose, mouth or throat

WHAT CAN I DO TO PROTECT MYSELF?

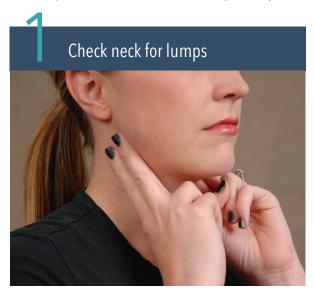

- Stop using tobacco
- Use alcohol in moderation
- Ask your physician about the Human Papillomavirus (HPV) vaccine
- Perform monthly self exams
- Regularly visit your dentist or physician, and ask for an oral, head & neck exam

ORAL, HEAD & NECK SELF EXAM

Follow the four steps below and look for abnormal, irregular, or discolored areas.

Compare one side to the other for symmetry.

If you discover abnormal, irregular, or discolored areas or lumps that are different on one side compared to the other, contact your health care provider or dentist.
